

Join us in Miami for the newly updated and expanded

NCI Charrette System

The Breakthrough Planning Tool for Community Transformation

2010 dates are
coming soon!

Visit <http://nuonline.arc.miami.edu/nci/>
for updates!

All participants completing the full course will receive a copy of The Charrette Handbook, recently published by APA Planners Press.

Course Overview

This 3-day training is a fresh, new course that illustrates the capability of the NCI Charrette System for all aspects of community planning. Participants learn the practical NCI Charrette System skills, tools and techniques through new interactive, hands-on exercises practiced on four case study types:

- Sustainable community planning
- Regional/comprehensive planning
- Transportation/infrastructure planning
- Transit oriented development planning

This training combines our previous “Introduction to Dynamic Planning” and “Continuing Dynamic Planning” trainings. It is equivalent to the NCI Charrette Planner® Certificate.

This course is accredited with the AIA for 18 continuing education system (CES) units and with the AICP for 18 certification maintenance (CM) credits.

This training will be led by Bill Lennertz, NCI, and David Brain, New College of Florida.
